William (Bill) Huffnagle, President, Reconstructive Division at Stryker Orthopaedics, is responsible for Stryker's transatlantic joint replacement business including hips, knees, robotics and Performance Solutions. Beginning in April 2016, Bill also assumed responsibility for Stryker's Trauson business, a leading implant manufacturer in the Chinese market. Bill started his Stryker career in 1988 as a Howmedica sales representative for the Delaware Valley Branch, and over the next 19 years demonstrated an outstanding track record for growth, and building his market share to over 72%. In 2007, he was promoted to the Delaware Valley Branch Manager role where he led his team to exceed quota with over \$8 million growth each year. In May 2009, Bill was promoted to Vice President and General Manager, Hip Reconstruction for the Orthopaedics Division. Under Bill's leadership, the division launched several exciting new products, including Stryker's ADM X3, the first anatomic mobile bearing hip system, the Modular Dual Mobility (MDM) system, and Accolade II. In May 2011, he was appointed as the first President for the newly formed Reconstructive Division. Bill brings exceptional customer relationship skills, strategic thinking and drive for results to the Division. He has demonstrated the ability to build and develop strong teams and for challenging the status quo to bring new, innovative approaches to drive business growth.

This President's Forum is a featured event in the Albert Dorman Honors College Colloquium Series and is made possible in part by the generous support of the DeCaprio Family. Innovation Day is sponsored by James Stevenson Foundation, Ronald E. McNair Achievement Program, National Science Foundation, PSEG, The Hearst Foundation, Needham Foundation, Peggy McHale, NJIT Office of the Provost, and NJIT Office of Research.
